Press Release

Amsterdam, September 25, 2019

Nexedi successfully completed certification of MiTAC Tioga Pass servers for SlapOS operation management system powered by Debian GNU/Linux. Any company can now build their own public or private cloud infrastructure based on a fully open-source, license-free solution with 100% success track record.

Debian on MITAC Tioga Pass

Thomas Gambier, Head of Rapid.Space cloud operations at Nexedi, stated: "MiTAC OCP Tioga Pass servers were installed with Debian 9 and SlapOS. They have gone through a one month period of intensive tests which combine CPU, RAM, SSD and networking at the same time by running forty of ERP instances on a 40-core server. All test results were successful".

Afred Chao, Co-Lead of OCP Taiwan and Special Assistant to the President Office of MiTAC Computing Technology Corp. OCP, stated "SlapOS powered by Debian adds a fully open-source, license-free option for companies willing to create their own public cloud or private cloud infrastructure based on OCP Tioga Pass.".

Jean-Paul Smets, CEO of Nexedi, concludes: "SlapOS is the only open-source IaaS or PaaS solution with 100% success ratio. Combining SlapOS and MiTAC Tioga Pass can slash costs by 5 to 20 compared to average public clouds."

About MiTAC Computing Technology Corp.

MCT is currently an OCP Platinum member and OCP Solution Provider.

MiTAC Computing Technology Corp. (MiTAC), a wholly owned subsidiary of MiTAC Holdings Corp. (TWSE: 3706), is focused on cloud computing solutions and services. MiTAC has design and manufacturing experience in enterprise servers, storage systems, embedded products and industrial computers. With more than 20 years in the industry, MiTAC has a well proven track record in hyper scale data center deployments. Combined with a 30 year history of TYAN server customization capacity, comprehensive relationships with channel and system integration service providers, MiTAC is now providing customers with deliverables featuring flexibility and customization while remaining aligned with different systems and application types. MiTAC's cloud computing solutions cover the entire spectrum, from rack and tower systems, high-performance and GPU-accelerated computing, cloud computing servers, storage systems, blade servers, and workstations, to complete systems and cabinets aimed at offering customers and markets the best TCO (Total Cost of Ownership) for public, private and hybrid cloud equipment for the next generation. MiTAC also offers smart client solutions covering panel PC, BOX PC, mobile POS, and industrial mainboards to offer brand owners and system integrators with specialty solutions

featuring better integration and competitiveness.
