

OSOE Course Guide

Read or you will die!

by [OSOE Project](#).

▼ Details

This presentation explains the most important facts you have to know before starting the OSOE course.

Two Course Variants

A. Virtual Machine Variant -> Preparation A

B. Online Instance Variant -> Preparation B

▼ Details

There are two Versions of the course. The standard way to do the course is by following the Virtual Machine Variant. Unless you have been told otherwise, follow the Tutorial in section Preparations A: Virtual Machine Course Variant and then jump directly to section Introduction.

Only, if you have got a link to an online instance of ERP5, you will follow the Preparations B: Online Instance Course Variant and afterwards continue with section Introduction

Evaluation

- Real implementation field
- For Supinfo Students: Register to the [Supinfo Questionnaire and Evaluation System](#)
- For all others: Register to the [MOOC Questionnaire and Evaluation System](#)

▼ Details

If you are doing the course during a university class or if you want to receive a certificate for the course, then you must register for the evaluation of the course. For students from the supinfo university, there is a dedicated registration form at https://www.tiolive.com/questionnaire/ERP5Site_viewNewCredentialRequestDialog. All others, please register at <https://www.tiolive.com/questionnaire/MOOC.Subscription>

The only requirement is to find a real case for the interview and your ERP configuration. For the evaluation, you have to do an interview with the management of an organisation. It can be a small company, like for example, a shop, an engineering company, a service company or a production company. Or it can be a department in a larger organisation. Or a not-for-profit organisation. Or a public administration. It is important, that you do the interview with the management of the organisation, else it will not work.

For Questions or Problems

1. Read [Class FAQ](#)
2. Read [OSOE Forum](#)
3. Ask [OSOE Forum](#)

▼ Details

In case you have any question or problem, please first read the [Class FAQ](#) to check, if your issue is described in our list of frequently asked questions. If you cannot find it there, please first read the posts in our [OSOE Forum](#) before you post yourself.
