

Hi,

Could you explain that clearly?

After importing VM, I logged in with the account "zope" and the password "pckalbxs", changed the first name and the last name then (Step 3 mentioned on Moodle). I continued with the first Tutorial "Careers and Assignments". Is that right? I am so confused about "Maybe follow the instructions again and change the password and user to something very simple." because I have not changed anything related to the password and user.

Best regards,
