

# Editor interface

Here we will detail how to use the editor interface.

□

1. The switch button
2. The favorite menu for fast access to file marked as "Favorite"
3. Expand: It expands the editor into the full window. Shortcut: Ctrl+e
4. Save: Save the current file. Shortcut: Ctrl+s
5. Menu: Menu offering various actions on the file
6. Tabs: Files are open in tabs. If the title of the file is displayed after a "\*" it means the files hasn't been saved
7. Tree: Display the current tree. More option are available by right clicking on files and direstories
8. Editor: To edit files. It uses [Ace editor](#) with most of its shorcut availables
