

Meetings and Courses

Members of the OSOE Project are organising meetings and lectures all over the world. Those meetings are a very good occasion for students to learn IT systems in theory and practice and for OSOE members to exchange about Education and Research, and to start new projects. You will find here the list of OSOE events.

Ongoing Events

OSOE Young Consultant Program	<i>September 2015 - February 2016</i> Competence Center eCommerce Soest (Germany)	The 7 th edition of the "Young Consultant Program" is organized together with the COMPETENCE CENTER eCOMMERCE and Fachhochschule Südwestfalen as a blended learning setup including an online peer review process and full lecture videos.
OSOE MOOC	<i>Since February 2013</i> World Wide	On 2013-02-27 we launched with SUPINFO International University and TU Dresden the first Massive Open Online Course (MOOC) to teach ERPs based on open source ERP5. About 1500 students located in 12 countries have already participated in the MOOC in addition to dozens of anonymous students from other institutions. The MOOC is based on ERP5, an open source ERP created by Nexedi and deployed by multinational companies and by governments on 4 continents and on the One Student One ERP (OSOE) education program.
